## Risks

Examines the risks and side effects of medicinal cannabis and how these risks compare with those for other substances patients use to self-medicate

## Cannabinoids

Discusses the nature of the cannabis species, the parts of the plant, its active substances, and how those substances work in the body

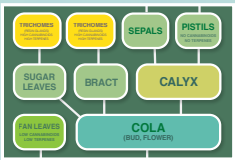

## Forms of Use

Explains how the plant is processed into different forms of use, so users can choose what's most appropriate

Understanding Product Labels					
Label	THC	THC + CBD	CBD	Other Cannabinoids	Terpenes
THC	100%	100%	0%	0%	0%
THC + CBD	100%	100%	100%	0%	0%
CBD	0%	0%	100%	0%	0%
Other Cannabinoids	0%	0%	0%	100%	0%
Terpenes	0%	0%	0%	0%	100%

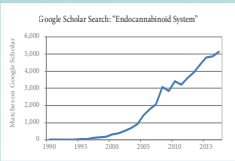

## Dosing

Reviews information on potency and dosing and how effects differ across products and individuals

## Whole Plant

Describes how cannabis compounds interact with one another to treat different medical conditions

## Healthcare Opposition

Presents the nature of healthcare industry support and opposition to medicinal cannabis; describes methodological problems with research findings
